Reasons For Allowance

Claims 1 – 22 are allowable.

1. The following is an examiner's statement of reasons for allowance: in combination with other limitations of the claims the prior arts made of record fail to suggest a system and method in which a coding in a time slot frame comprises preloading at least one time slot with an off-value at a specified position; and wherein the time slots that have not been preloaded have, at most, one time slot with an on-value in order to form a logic value of a double bit.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
3. Cho (US Patent Number 5,375,249) discloses an eight-to-fourteen modulation circuit for a digital audio disc system.
4. Ino et al. (US patent Number 5,506,581) discloses a modulation method, modulating device and demodulation device.
